SOURCES OF EXHIBIT SUPPLIES, EQUIPMENT AND SERVICES

Compiled by
H. W. Gilbertson, Technical Analyst
Extension Service
United States Department of Agriculture

The following list of names and addresses of companies that make or sell supplies and equipment used in preparing educational exhibits was compiled for the use of Cooperative Extension employees. The list supplements the information contained in United States Department of Agriculture Miscellaneous Publication No. 634 entitled, "Educational Exhibits - How To Prepare and Use Them."

Although long, the list is far from complete since there are many other dealers or manufacturers of materials of equal merit that have not come to our attention. The inclusion of names of companies does not constitute an endorsement by the author or by the Extension Service of the Department of Agriculture of the products of these companies in preference to those of companies not listed.

The author will appreciate having other desirable sources of such supplies brought to his attention in order that a more complete revised list may be made available.
